Refine

The three-hole water:
flow mode provides a wider Angle of water coverage, and the water column is delicate and soft, suitable for large area washing, preventing splash, while reducing impact and protecting ceramics and other vulnerable materials. Even water flow, clean without dead corners, make daily cleaning more relaxed and pleasant.

Cluster water:
efficient flushing, accurate and powerful
The cluster water mode uses a high-pressure concentrated water flow design and strong jet force to quickly flush stubborn stains, whether it is cleaning the toilet, the floor, or hard-to-reach gaps, it is easy to solve. Efficient flushing, water saving and no waste, keep the bathroom clean as new

Selected high-quality materials, exquisite workmanship, faucet surface smooth and delicate, corrosion resistance, wear resistance, durable.
